Chiavari shoes by Drake

Chiavari shoes: no more sinking

Break the rules and move seating to locations that have always been traditionally difficult for chairs.

Our chair shoes increase support for the chair legs on difficult ground, greatly reducing the sinking of the legs.

Whether on the beach, on a green at your favorite golf club, or simply on a backyard lawn, our support system lets you bring our classy Chiavari chairs and your unforgettable events to a whole new level outdoors.

Our Chiavari shoes are easy to deploy. Snap them onto the chair legs, no tools required, snap them off when finished.

Our Chiavari shoes do not interfere with the chairs ability to stack. Chairs can be collected, stacked, stored, moved and re-deployed without removing the shoes.

Small holes in the supporting plate area, allow the lawn to breath, greatly minimizing any damage to it even with extended use of the chair on the grass.

One set includes 4 shoes for one chair.

Chiavari shoes: secure chairs to a pallet

Our Chiavari shoes can be used to secure our Chiavari chairs to a wood pallet, for easier and secure transportation.

When one set of Chiavari shoes is screwed into a wood pallet, it secures the first chair of the stack to the pallet, preventing the chairs from sliding, keeping them firmly in place on the pallet.

Use of additional strapping (not included) is suggested before moving a stack of chairs.

One set includes 4 shoes for one chair.
