THE MATERIAL

The material we use is a composite multi-layer techno-polymer, and the process involved (CO-INJECTION systems) is the highest standards in plastic manufacturing. The result is an outer, smooth aesthetic SAN skin, and an inner expanded closed cell modified ABS resin with high mechanical resistance that behaves like a bone and gives exceptional strength to the toilet seat. Our toilet seats are anti-bacterial, do not absorb humidity, nor are adversely affected by salts, acid and grease.

7 YEAR GUARANTEE
