item# 3TRCKDR Chair Truck

## MATERIALS

The material used, a composite multi-layer techno-polymer, allows the manufacturing of special event resin chairs that are the strongest (tested at 500lb.) and the lightest at the same time on the market. STRUCTURE, FAN, ISPRA, PRADA and CHIAVARI chairs are manufactured with a TWO COMPONENT RESIN (CO-INJECTION) system, while CHIP chairs are manufactured with a TWO COMPONENT RESIN (CO-INJECTION) plus GAS system - the highest standards in plastic manufacturing. The result is an outer, smooth all weather resistant aesthetic skin, and an inner expanded closed cell modified resin with high mechanical resistance that behaves like a bone and gives exceptional strength to the chair.

## Chair Construction Principle

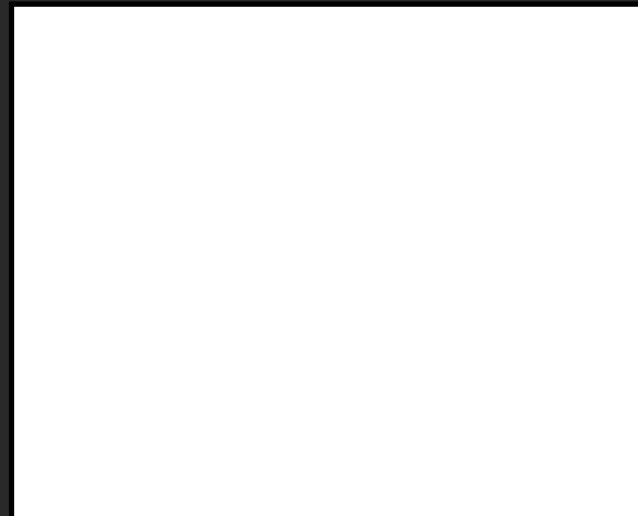

The LOAD rests on the two bars supporting the seat, NOT on the screws as on similar chairs. All folding chairs must comply to our 500lb. of static vertical weight standard. Federal specifications AA-C-291F

- Drake wedding chairs are the only chairs which are made of a composite multilayer techno-polymer, with the best materials available on the market:
- UV Stabilized
  - So strong that it does NOT require any metallic insert in the legs to make them hold up
  - Lightest
  - Whitest

ALL PARTS OF THE CHAIR ARE MADE WITH THE SAME MATERIAL. There is NO difference in seat and leg components unlike similar chairs. Furthermore WE DO NOT USE ABS plastic that tends to be more fragile than PP and less stable to UV exposure. Resin chairs are NOT all the same. Ask for "DRAKE" chairs if you want the best.

## FAN CHAIR by Drake

### COMFORTABLE

The high back provides comfort and support, ideal for prolonged seating. The 1/4" flexible padded resin seat is more comfortable than the wood seat. It snaps in and snaps out in a flash without any tools or screws:  
 - won't warp with humidity  
 - more comfortable because of the flexibility of the material they are made from.

**STRONG: Tested at 500 lb.**

### EASY To Handle & Maintain

No more hanging on racks as with similar chairs!!! Fan chairs are folding, stacking (horizontally and vertically), and come equipped with an interlocking feature that makes moving and storing them quite simple. They are strong, durable, weatherproof, UV protected, never need painting and require very little maintenance.

### DIMENSIONS

Flat Chair dimensions: 17.3" x 41.5" x 2.3"  
 Net weight: 10.5 pounds including padded seat.

### SHIPPING

Fan chairs come in a box of 5 ea.  
 17 3" x 41.5" x 12.5" at 55 lbs.

Item# 5FanW-W • Fan White/White Pad  
 Item# 5FanB-B • Fan Black/Black Pad  
 Item# 5FanS-B • Fan Silver/Black Pad  
 Item# 5FanI-I • Fan Ivory/Ivory Pad

### ACCESSORIES

Item# RsiPWit • Extra White Seat  
 Item# RsiPBit • Extra Black Seat  
 Item# 3base-Fan2200 • Chair Pallet/FAN  
 Item# 3TRCKDR • Chair Truck

## CHIP & STRUCTURE CHAIRS by Drake

### COMFORTABLE

The 1/4" flexible padded resin seat is more comfortable than the wood seat. It snaps in and snaps out in a flash without any tools or screws:  
 - won't warp with humidity  
 - more comfortable because of the flexibility of the material they are made from.

**STRONG: tested at 500 lb.**

**LIGHTWEIGHT 10 lb. ONLY!!!**

### EASY To Handle & Maintain

Folding, stacking (horizontally and vertically), and Interlocking. They are strong, durable weatherproof, UV protected, never need painting and require very little maintenance.

\*\*\*NOTE The main difference between Chip and Structure chairs is the technology used to manufacture them. CHIP chairs have a hollow core, in order to match the same thickness of the wood. STRUCTURE chairs are solid all the way through (no hollow core) and more rigid. They also differ slightly in shape.

### DIMENSIONS

Flat Folding Chair dimensions: 17 3/8" x 35" x 2 1/3"  
 Net weight: 10 lb. including padded seat.

### SHIPPING

Both Structure and Chip chairs come in a box of 5 ea.,  
 18"x36"x13" at 52 lb.
